

The diversified **crystal clear** series by goldor' mosaico made of highly transparent real glass produces impressive effects, especially due to its reflective effects on light as well as the feeling of briskness and liveliness. A modern colour palette, clear glossy surfaces and attractive, individual colour blends are further attributes of this series emphasizing its diversity.

goldor' mosaico offers architects, interior designers, professional industrial and private customers a first-class original glass product - supplied in impressive colours, an excellent quality and a great diversity. Selected high-value raw materials, special manufacturing technologies and a distinct awareness as to quality during production and processing guarantee lasting colours and a hard-wearing surface finish.

goldor' mosaico tiles are manufactured per order in individual blends, optionally on paper or transparent film (30 x 30 cm). When it comes to the desired colour gradient and other formal requests regarding design or integration of figurative patterns, laying markers and numeration are available to facilitate further processing on site.

goldor' mosaico

International top class mosaic in real glass

The decision for goldor' mosaico glass mosaic is always a step towards distinctive individuality and a great variety of design options for any project - whether wet areas, a purely representative ambience, whether floors, walls, columns or ceilings, small or large surfaces, straight or curved, square or rounded. Design and panelling with goldor' mosaico leave room for manifold variations. The versatility of the range as well as quality and reliability of our delivery service have been internationally approved, emphasizing the special, leading position of this brand.

ISO 10545-12/UNI EN 202 Frost resistance	resistant
DIN 51094 Colour stability	resistant

sizes and weights

Glass mosaic (tessera) sizes	23 x 23 x 4 mm
Pre-packaging	Front side paper-faced (foil-faced possible)
Ready-made tiles size	298 x 298 mm
Width of joints	2.0 mm
Tesserae per ready-made tile	225
Ready-made tile per m ²	10 pieces = 1.03 m ²
Weight (kg) per m ²	8.0 kg
Item order number	CCS - in addition articlecode (example: CCS - CC.01)

Colour gradients in crystal clear

The above examples of colour gradient mixtures are especially representative of the variability, colour diversity, transparency and lightness of the **crystal clear** series. **crystal clear** colour gradients are manufactured in a special process according to your design wishes and to individual specifications of length.

design-variations crystal clear

design proposals

This data sheet conveys a pre-selection of current design variations of the **crystal clear** series. Defining your own design compositions is facilitated in this way, resulting also in shorter delivery times.

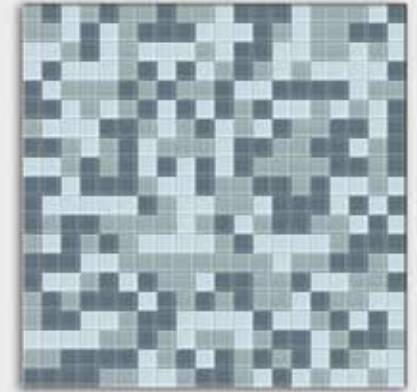

Creative and individual compositions

Beyond the scope of the presented pre-selection, goldor´mosaico produces individual glass mosaic design compositions according to our customers' preferences. What is required in this case is a design model or information about the mixing ratio of the desired glass mosaics. The goldor´mosaico website provides a special Mix Generator that facilitates the creation of individual compositions, giving your creativity free reign.
