

goldor'mosaico

International top class mosaic in real glass

The decision for goldor´mosaico glass mosaic is always a step towards distinctive individuality and a great variety of design options for any project - whether wet areas, a purely representative ambience, whether floors, walls, columns or ceilings, small or large surfaces, straight or curved, square or rounded. Design and panelling with goldor´mosaico leave room for manifold variations. The versatility of the range as well as quality and reliability of our delivery service have been internationally approved, emphasizing the special, leading position of this brand.

The **veneziano** series by goldor´mosaico represents the classical component among the mosaics. The wide colour spectrum of single-colours or marbled real glass tesserae is perfectly suited as basis for all conceivable individual blends to be laid on floors or unfold their special decorative effect as panelling on walls or columns. Imagination and inspiration make for the most unique designs also on borders, patterns or figurative patterns using goldor´mosaico **veneziano**.

goldor´mosaico offers architects, interior designers, professional industrial and private customers a first-class original glass product - supplied in impressive colours, an excellent quality and a great diversity. Selected high-value raw materials, special manufacturing technologies and a distinct awareness as to quality during production and processing guarantee lasting colours and a hard-wearing surface finish.

goldor'mosaico tiles are manufactured per order in individual blends, optionally on paper or transparent film (30 \times 30 cm). When it comes to the desired colour gradient and other formal requests regarding design or integration of figurative patterns, laying markers and numeration are available to facilitate further processing on site.
