

## goldor' mosaico

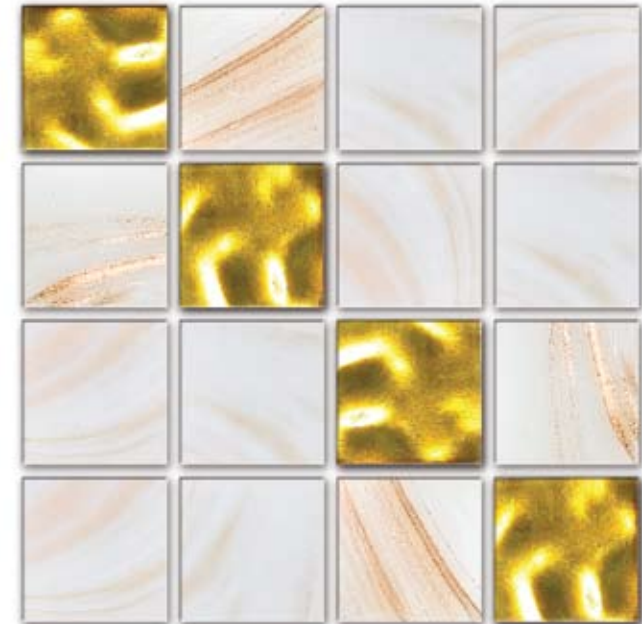

International top class mosaic in real glass

The decision for goldor' mosaico glass mosaic is always a step towards distinctive individuality and a great variety of design options for any project - whether wet areas, a purely representative ambience, whether floors, walls, columns or ceilings, small or large surfaces, straight or curved, square or rounded. Design and panelling with goldor' mosaico leave room for manifold variations. The versatility of the range as well as quality and reliability of our delivery service have been internationally approved, emphasizing the special, leading position of this brand.

The goldor' mosaico program provides the perfect tools and means for realizing design ideas in mosaic. **Architectural design** using goldor' mosaico real glass mosaic is most impressive by its outstanding classiness.

The comprehensive range of real glass mosaics composed of many matching series that can be mixed offers architects, interior designers, professional industrial and private customers a first-class original glass product - available in impressive colours, excellent quality and a great diversity. Selected high-value raw materials, special manufacturing techniques and a distinct quality consciousness during production and processing guarantee lasting colours and a hard-wearing surface finish.

goldor' mosaico tiles are manufactured per order in individual blends, optionally on paper or transparent film (30 x 30 cm). When it comes to the desired colour gradient and other formal requests regarding design or integration of figurative patterns, laying markers and numeration are available to facilitate further processing on site.

## architectural design - individual patterns

1.) Basis: an old parchment print

4.) Laying of the prepared, marked mosaic tiles

2.) Conversion into a graphical template

3.) Laying of mosaic on adhesive paper

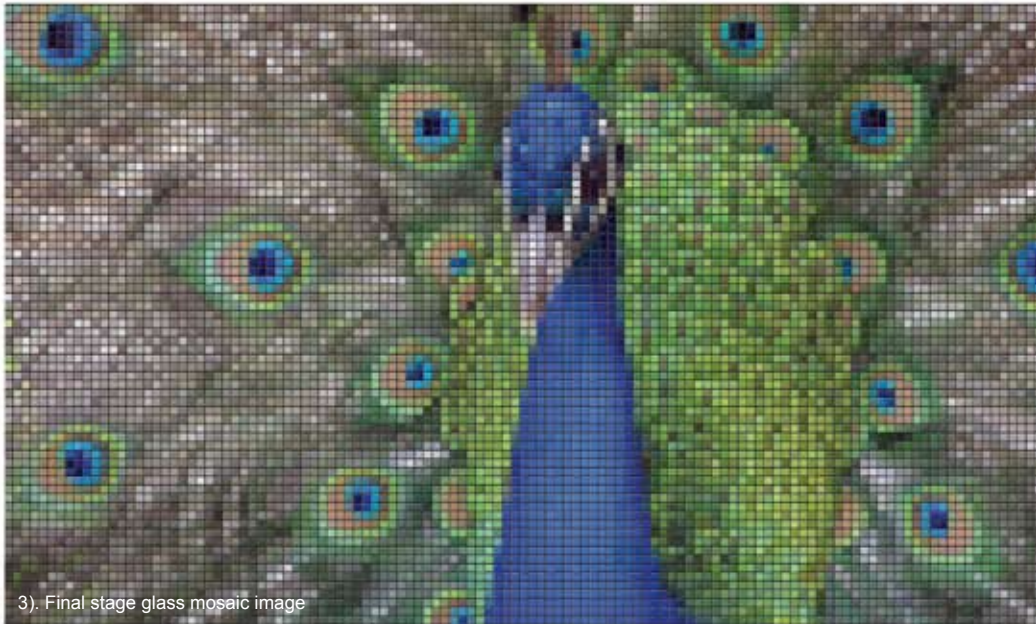

### Graphics, emblems, brands

The possibilities for reproduction that goldor´mosaico real glass mosaic offers are almost unlimited. The comprehensive product and colour spectrum, different sizes and material compositions (also real gold, white gold etc.) as well as surfaces lay the foundation for all kinds of ambitious targets. A reproducible picture, a drawing or even typography can serve as a model. The above example points out how projects are realized.

## architectural design - individual wall picture

1.) Original master/artwork

3.) Final stage glass mosaic image

2.) Creative mosaic artwork

### Images

Converting pictures successfully into a real glass mosaic image is a real challenge as to the quality of workmanship and skills. goldor'mosaico has mastered this technique for years. The sophisticated product and colour range of glass mosaics, also available in different sizes, allows the incorporation of fine nuances. This is demonstrated very well by the example.
